WHO AM I?

I'm a Computer-Science Student, tech enthusiast and a privacy advocate. In 2021, I've founded Pirates4Freedom which aims to help people getting their freedom on the Internet back.

Good notions: Java, Symfony, Javascript

EXEMPLE OF RECENT PROJECTS

- | | | |
|--------------------------|---|-----------------|
| 2021
Volunteer | Rust Developer
I rewrote the software which generates html index pages for services' statistic of the association. It is now going 3 times faster than the previous implementation.
Rust / Sailfish / TOML | 42l Association |
| 2021
Personal project | Full stack Developer
Created a forum with pure PHP from scratch.
PHP / MySQL / Linux / CSS | Pirates4Freedom |
| 2021
Personal project | Python Developer
I made an implementation of the ELO ranking system. This project is made to be used in other projects.
Python | |
| 2020
Personal project | System Administration
Implementation of a self-hosted infrastructure with nginx server, Gemini server and onion service (Tor).
Debian / Nginx / Agate | |

FORMATION

- | | | |
|--------------------------|---|------------|
| 2021 - 2024
Currently | Architect in Digital Technology Student
I am currently taking the core curriculum where I am learning low level programming and algorithms. I would like to specialize in the cyber security branch after completing the core curriculum. | 42 - Paris |
| 2012 - 2022 | Self-taught
Site Du Zéro/OpenClassrooms, FreeCodeCamp, TryHackMe, Root-Me, HackTheBox... | |

LANGUAGES

French - native speaker
English - Bilingual
